Lleidatech

The applications of Artificial Intelligence, Data Science, and Systems Optimization allow the efficient and sustainable digitization of our business, industrial, and social sectors. In collaboration with the Lleida City Council, the University of Lleida, and the Polytechnic

University of Valencia, we organize the Lleida Artificial Intelligence & Optimization workshop (LAIO 2024). This event, framed within the actions of Lleida Tech and the Agrobiotech scientific park, will be held in Lleida, Spain (<https://goo.gl/maps/45BHncw1P472sdox9>) on October 24 and 25, 2024.
